HEALTH OPTIMIZING WELLNESS CLINIC

Santé's Health Optimizing focus is to find the root cause of a health challenge, and stimulate your intrinsic self-regulating mechanisms. We use a combination of breakthrough technologies to map out both the primary and secondary causative factors on a physical, biochemical, energetic, emotional, and lifestyle-related level.

Health Optimizing utilizes the latest non-invasive and effective technologies for assessment and treatment, applied at Santé by a team of specially trained doctors and therapists.

With its origins in the emerging fields of Technology based Functional and Energy Medicine, Health Optimizing is part of a global group of clinics founded in Norway.

ASSESSMENTS & TREATMENTS

Health Optimizing Assessment

120 min R5 600

Performed by a Medical Practitioner, our all-encompassing, non invasive, technology based assessment will find out, at a cellular level, what is out of balance or not functioning correctly, and most importantly why. We identify triggers and causes and provide you with a personalised recommended report and treatment protocol to deal with your identified health issues.

Wellness Assessment

60 min R2 950

Performed by an Integrative Practitioner, we assess at a cellular level how the digestive system is functioning, thyroid balance, autonomic nervous system balance, cardiovascular risk factors, cellular and mitochondrial functioning, inflammation levels and more. The Wellness Report gives lifestyle recommendations and treatment protocols for achieving optimal health.

Voice Analysis and Neuro Biofeedback

2 hrs R5 250

The unique Voice Analysis technology detects psychosomatic and emotional triggers and patterns, combined with Neuro-Biofeedback for regulation of brainwaves, subconscious processes, neurotransmitters and activity in different parts of the brain. You will receive personalised sound files for continued treatment to balance brain waves and stabilize subconscious patterns. Highly effective in the treatment of emotional issues including burnout, anxiety and depression. Greatly enhances learning and the ability to concentrate.

Biofeedback Technology

2.5 hrs R4 900

Comprehensive programs that stimulate intrinsic mechanisms to resolve a variety of health challenges by sending triggers and resonance for self healing. By stimulating specific mechanisms in the body, you can return to homeostasis, allowing the body to self heal and self regulate again.

Papimi Ion Induction Therapy (High Intensity PEMF)

30 mins R1 150

Improves cell function, reduces inflammation and stimulates repair processes by increasing cellular voltage. Highly effective in the treatment of injuries, inflammation, and improving organ functioning.

Monocrom Brain Stimulation

10 mins R770

The Monocrom stimulates dendritic activity in the brain resulting in improved brain function. The after effect can be a feeling of peace, joy, upliftment, and psychological shifts. It may also produce a strong detoxification response, along with marked improvements for depression, fatigue and forgetfulness.

High-Definition Thermography

20 - 60 min

(Time & price are dependent on the procedure)

Non-invasive thermal imaging which identifies areas of inflammation in the body. Ideal for breast health and other inflammatory screening.

Other treatments available post assessment:

Pulsed Plasma Light Technology

60 mins R1 920

Destroys specific microorganisms and pathogens through a resonance effect, without the use of medication.

Nitric Oxide gas technology

15 mins R900

Increases Nitric Oxide levels within minutes, a critical factor for cardiovascular health and for stimulating the healing of diabetic ulcers.
