About Our Treatments

Some of the key Health Optimizing and Bio Energy treatments

Initial Assessment

An all encompassing, non invasive technology based assessment which finds out, at a cellular level what is out of balance or not functioning correctly, and most importantly, why.

Papimi Ion Induction Therapy

Increases the cell voltage in local tissue which enables cells to exchange ions correctly. This improves cell function, reduces inflammation and stimulates the repair processes.

Pulsed Plasma light technology

Destroys microorganisms through a resonance effect without the use of medication

Biofeedback technology

Stimulates intrinsic mechanisms to resolve a variety of health challenges by sending specific trigger and resonance for self healing.

Voice analysis and Neuro Bio feedback

Our unique Voice Analysis technology detects psychosomatic and emotional triggers and patterns. Highly efficient in the treatment of emotional issues including depression, anxiety and burnout.

Cell Regulation (PEMF)

Pulsed electro magnetic field therapy can improve circulation, reduce pain, improve functioning of the immune system and enhance relaxation

Crystal Light therapy

Brings deep relaxation, improved energy and a balanced human energy field.

Cymatherapy

Vibrational sound therapy which treats stress, pain, optimizes relaxation and is particularly effective in alleviating inflammation
